

# KETTLER ALU-RAD Program 2024

MADE IN  
GERMANY

MADE IN  
GERMANY

## LIEBE FACHHANDELSPARTNERIN, LIEBER FACHHANDELSPARTNER,

### Für alle. KETTLER.

In unserer neuen Händlermappe finden Sie wie gewohnt ein breites Angebot an E-Bikes und Fahrrädern aus verschiedenen Produktkategorien. Neben der neuen E-Traveller-Gold Serie, möchten wir Ihnen ein neues Highlight vorstellen. Die neue PINNIATO Serie mit Pinion Motor Gear Unit.

Mit einer maximalen Leistung von bis zu 600 Wh (800 Wh S-Pedelec Version) und bis zu 400% Unterstützung, glänzt der neue Motor mit dem integrierten Schaltgetriebe vor allem durch Verschleißfreiheit. Wahlweise vollgefedert oder als Hardtail, mit 720 oder 960Wh erhältlich (auch als S-Pedelec Version verfügbar). Die ersten Modelle können noch in diesem Jahr geliefert werden. Das neue Cargobike mit der Pinion Drive Unit planen wir für Anfang 2024.

Außerdem finden Sie unsere bewährten Modelle mit neuen Farben, um Ihr Sortiment für 2024 ideal aufzustellen.

Trotz einiger Herausforderungen blicken wir zuversichtlich in die Zukunft. Laut dem FOCUS E-Bike Anschaffungsbarometer, planen knapp 3 Millionen Deutsche einen E-Bike Kauf in den nächsten 6 Monaten, davon ca. 30% in der Altersgruppe über 50 Jahre. Also der Zielgruppe, die mit der Marke KETTLER aufgewachsen ist. Daher überrascht es auch nicht, dass die höchste Ausgabebereitschaft zwischen 3000,00 und 3999,00€ liegt. Einer der führenden Lieferanten spricht

für dieses Jahr von ähnlichen Verkaufszahlen wie 2022. Für 2024 wird sogar ein Wachstum von mehr als 6% erwartet.

E-Bikes und Fahrräder sind und bleiben Teil der Mobilitätswende mit Einfluss auf Infrastrukturpläne der Städte und Kommunen. Das Auto wird neben Platzgründen auch immer häufiger aus Kostengründen durch ein E-Bike ersetzt. Fahrradfahren ist gesund und Spaß macht es auch noch. Und mit dem bekannten Dienstrad Leasing von EURORAD oder dem neuen Abo-Modell nehmen Sie der Kundschaft die Hürde bei hochpreisigen Modellen.

Wir freuen uns auf die Zusammenarbeit und stehen jederzeit gern für Ihre Fragen und Anregungen zur Verfügung. Alle Kontakte finden Sie auf den folgenden Seiten.

Wir verbleiben mit höchstem Respekt und den besten Wünschen,

**Ole Honkomp, Hans Retzlaff**  
**und das gesamte Team KETTLER Alu-Rad**

## FOREWORD

## DEAR KETTLER ALU-RAD PARTNER,

**For all. KETTLER.**

As usual, you will find a wide range of e-bikes and bicycles from various product categories in our new dealer catalogue.

In addition to the new E-Traveller-Gold-Series, we would like to present a new highlight. The new PINNIATO series with Pinion Motor Gear Unit.

With a maximum power of up to 600 Wh (800 Wh S-Pedelec version) and up to 400% assistance, the new motor with integrated gearbox especially convinces by being wear-free. Optionally available with full suspension or as a hardtail, with 720 or 960 Wh (also available as S-Pedelec-Version). The first models can be delivered this year. We are planning the new cargo bike with the Pinion Drive Unit for the beginning of 2024.

You will also find our proven models with new colours to ideally position your range for 2024.

Despite some challenges, we are optimistic about the future. According to the FOCUS E-Bike Purchase Barometer, almost 3 million Germans are planning to buy an e-bike in the next 6 months, 30 % of them in the age group over 50. The target group that grew up with the brand KETTLER. Therefore it is not surprising that the highest willingness to spend is between 3000 and 3999 euros. One of the leading

suppliers is talking about similar sales figures for this year as in 2022. For 2024, growth of more than 6% is expected.

E-bikes and bicycles are and will remain part of the mobility transition with influence on infrastructure plans of cities and communes. The car is increasingly being replaced by an e-bike, not only for reasons of space but also for reasons of cost. Cycling is healthy and fun too. And with EURORAD's known service of bike leasing or the new subscription model, you take the hurdle out of customers' hands when it comes to high-priced models.

We look forward to working together and are always happy to answer your questions and listen to your suggestions. You will find all contacts on the following pages.

We remain with the highest respect and best wishes,

**Ole Honkomp, Hans Retzlaff  
and the entire KETTLER Alu-Rad team**

**Unsere spannenden Modelle begeistern mit innovativen Systemen und einem glanzvollen Design. Mit „Pinniato“ wird unser Programm außerdem durch eine neue Modellserie im E-City und E-Trekking Segment ergänzt, die sich durch das neue, innovative Pinion E-Drive System auszeichnet. Neben zwei sportlichen 12-Gang Modellen sind zwei S-Pedelec Varianten und eine 9-Gang Comfort Variante erhältlich:**

#### Hier ein kleiner Überblick:

- PINNIATO FS SPORT
- PINNIATO HT SPORT
- PINNIATO FS SPEED
- PINNIATO HT SPEED
- PINNIATO HT COMFORT

#### NEUE SYSTEME

##### Pinion E-Drive System

Pinion MGU steht für PINION MOTOR.GEARBOX.UNIT – der innovative Ansatz vereint einen leistungsstarken Elektromotor mit bewährter Pinion Getriebschaltung zu einem völlig neuen Antriebssystem für E-Bikes: Eine Einheit, die alles verbindet und einen Schaltvorgang innerhalb von Sekundenbruchteilen ermöglicht, auch unter Last.

Das kompakte Paket aus Motor, Getriebe und Schaltung steht für eine harmonische, auf den Gang abgestimmte Leistung, eine sorglose Schaltperformance und verändert zudem das moderne E-Bike-Design. Alle Antriebskomponenten und die Steuerungstechnik sind in der MGU zusammengefasst und wurden speziell für dieses Zusammenspiel ausgelegt. Die MGU-Technologie zeichnet sich durch einen langlebigen, extrem verschleißarmen, leistungsstarken E-Bike Antrieb für den Dauereinsatz aus.

##### Die Kernmerkmale der MGU-Technologie auf einen Blick:

- Kompakter, sehr kräftiger Mittelmotor mit bis zu 12 integrierten Gängen
- E-Biken 10.000 km wartungsfrei
- Antriebsmoment von ca. 85 Nm
- Systempartner FIT

##### Bosch DualBattery

Bosch ist und bleibt ein starker und wichtiger Partner. Da ein Akku allein nicht immer ausreichend ist, hat Bosch eBike Systems eine Lösung entwickelt, um die Reichweite zu maximieren. Die DualBattery zeichnet sich durch eine Kombination zweier Akkus aus, die gleichzeitig genutzt werden können und bis zu 1.250 Wh liefern.

Damit bietet Bosch eBike Systems die perfekte Lösung für Touren, Langstrecken und Lastentransporte. Das System schaltet zwischen den beiden Akkus um, sodass sie gleichmäßig ge- und entladen werden, was auch für eine erhöhte Lebensdauer sorgt. DualBattery für das smarte System wird ab 2024 verfügbar sein und lässt sich in nahezu allen Akkukombinationen verbauen.

##### SHIMANO LINKGLIDE

Alle Modelle mit LG im Modellnamen sind mit dem neuen Shimano LG ausgestattet. LINKGLIDE erlaubt ein sanftes Schalten und Pedalieren, beides verlängert die Lebensdauer. LINKGLIDE unterstützt über Jahre hinweg stressfreies Fahren und Fahrerlebnisse für neue Fahrradtypen und Fahrstile. Dieser Antrieb ist außergewöhnlich langlebig, widersteht der täglichen Beanspruchung und bietet für Mehrzweckräder und drehmomentstarke E-Bikes lange gute Schalt- und Pedalierereigenschaften.

Das robuste Kassettendesign schaltet ruckfrei hoch und runter und reduziert den Verschleiß der Komponenten erheblich. LINKGLIDE ist das ultimative langlebige Komponentensystem.

##### LINKGLIDE Hauptmerkmale

- Sanftes und schnelles Schalten und Pedalieren, beides verlängert die Lebensdauer und Haltbarkeit
- Optimierte Schaltilfen
- Robuste Kassettenzähne verkraften selbst Schalten und Fahren unter hoher Last

**Our exciting models inspire with innovative systems and a glamorous design. With PINNIATO our range is complemented by a new model series in the e-city and e-trekking segment, which feature the new, innovative Pinion E-Drive System. In addition to two sporty 12-speed models, two S-pedelec variants and an 9-speed comfort variant are available:**

**A brief overview:**

- **PINNIATO FS SPORT**
- **PINNIATO HT SPORT**
- **PINNIATO FS SPEED**
- **PINNIATO HT SPEED**
- **PINNIATO HT COMFORT**

**NEW SYSTEMS**

**Pinion E-Drive System**

Pinion MGU stands for Pinion MOTOR.GEARBOX.UNIT – the innovative approach combines a powerful electric motor with proven Pinion gearing to create a completely new drive system for e-bikes.

The compact package of motor, gearbox and shifting stands for harmonious, gear-matched power, carefree shifting performance and also changes the modern e-bike design. All drive components and the control technology are combined in the MGU and were specially designed for this interaction. The MGU technology is characterised by a durable, extremely low-wear, high-performance e-bike drive for continuous use.

**Key features of the MGU technology:**

- Compact, very powerful mid-engine with up to 12 integrated gears
- E-biking 10.000 kilometres maintenance free
- Driving torque of approx. 85 Nm
- System partner FIT

**Bosch DualBattery**

Bosch is and remains a strong and important partner. Since one battery is not always enough, Bosch eBike Systems has developed a solution to maximise the range. The DualBattery features a combination of two batteries that can be used at the same time and provide up to 1250 Wh of power. This makes the system the perfect solution for touring, long-distances and load transport. The system switches between the two batteries so that they are charged and discharged evenly, which also ensures an increased service life span. DualBattery for the smart system will be available from 2024 and can be installed in almost all battery combinations.

**SHIMANO LINKGLIDE**

All models with LG in the model name are equipped with the new Shimano LG. LINKGLIDE delivers seamless shifting and pedaling performance that's made to last.

LINKGLIDE will support stress-free riding and ownership experiences for evolving bike types and riding styles for years to come. It is an exceptionally durable drivetrain built to stand up to persistent daily wear and provide enduring shifting and pedaling performance for multi-purpose bikes and high-torque e-bikes.

The robustly engineered cassette design shifts up and down gears seamlessly while significantly reducing drivetrain wear. LINKGLIDE is the ultimate utility drivetrain that delivers long-lasting performance.

**LINKGLIDE Key Features**

- Smooth and decisive shifting and pedaling performance that's made to last
- Optimized shifting gate design
- Robust cassette teeth resist damage when shifting and driving under high torque

Die deutsche Verkehrswacht empfiehlt aus Sicherheitsgründen Kindersitze, hinter dem Fahrer zu montieren, da die Kinder bei einem eventuellen Unfall sicherer sitzen. Wir haben diese und weitere Sicherheitsaspekte bei der Entwicklung unseres QUADRIGA Kindersitzes einfließen lassen. Dazu gehören ein Drei-Punkt-Sicherheitsgurtsystem mit Magnetschloss sowie verstellbare Fußrasten inklusive Fußschlaufen. Der Kindersitz ist außerdem mit einem Fach für einen Regenschutz (als Zubehör erhältlich) sowie einem Universalbefestigungssystem, welches es erlaubt, den Kindersitz mit vielen gängigen Rahmentypen zu verbinden, ausgestattet. Der QUADRIGA Kindersitz hat alles, was das Radfahren mit Kind einfacher und sicherer macht. Über das „K-LINK“ System lässt er sich mit vielen unserer E-Bikes sofort und werkzeugfrei verbinden.

- 3-Punkt-Gurtverschlussystem von Fidlock (Magnet-Sicherheitsgurtschloss)
- Neigung in 3 Positionen, verstellbar
- Polster aus EVA (weich, stoßabsorbierend und wasserabweisend)
- Flaschenhalter
- Fach für Regenschutz
- Ergonomische Form (Helmaussparung)
- Verstellbare Fußrasten und Fußschlaufen
- Integrierter Reflektor
- MonkeyLink Adapter für Rücklicht (Rücklicht als Zubehör erhältlich)

The German Road Safety Organization recommends rear-mounted models for safety reasons. We have incorporated these and other safety aspects into the development of our QUADRIGA child seats. This includes a threepoint safety belt with a magnetic lock as well as adjustable foot rests and foot straps. The child seat is also equipped with a storage place for a rain cover (available as an accessory) and an universal fastening system that allows the child seat to be connected to many common frame types. The QUADRIGA child seat has everything which makes cycling with your child simple and safe. It can quickly and securely be fastened to many of our e-bikes using the K-LINK system.

- 3-point-buckle system by Fidlock (Magnetic seatbelt lock)
- 3-position adjustable tilt
- Pad made of EVA (soft, shock absorbing and water resistant)
- Compartment for rain protection
- Ergonomic shape (helmet recess)
- Adjustable foot pegs and foot straps
- Integrated reflector
- MonkeyLink adapter for rear light (Rear light available as accessory)

Der Flaschenhalter MonkeyLink wird direkt am Fahrradrahmen montiert. Nicht für alle Modelle kompatibel, aber für die meisten Quadriga-, Escaro- und Comfort Modelle. Kompatibel mit z.B. Fidlock Adapter, Flaschenhalter.

The bottle holder MonkeyLink must be mounted directly on the bike frame. Not compatible for all models, but for most Quadriga, Escaro and Comfort models. Compatible with e.g. Fidlock adapter, bottle holder.

# KETTLER MONTAGESTÄNDER 2.0

## KETTLER BIKESTAND 2.0

ART.NO.  
08949-330

**SCHNELLVERSCHLUSS-KLEMMBACKENSYSTEM**  
/ QUICK-RELEASE CLAMPING JAWS SYSTEM

**179,90 €\***  
179,90 CHF\*

Unseren neuen KETTLER ALU-RAD Profi-Montageständer 2.0 haben wir mit einem innovativen und sehr praktischen Schnellverschluss-Klemmbackensystem ausgestattet. Somit ist er bestens für die Werkstatt zu Hause geeignet.

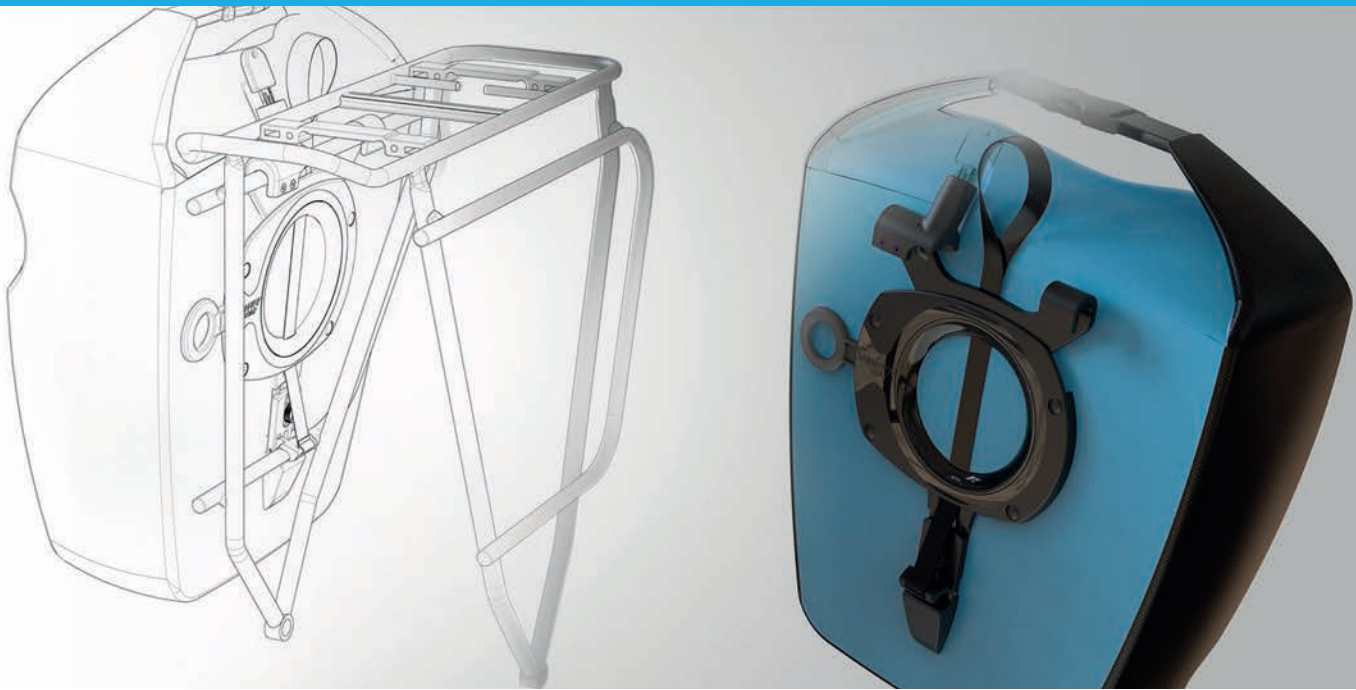

- Belastbarkeit bis 25 kg
- Arbeitshöhe ab 1125 mm bis 1425 mm
- Spannbarer Rahmendurchmesser von 25 mm bis 70 mm
- Aufstellmaße mit aufgesteckter Werkzeugkiste:  
Breite 1275 mm / Tiefe 825 mm / Höhe 1225 mm

- 1.) Das innovative, praktische Klemmbackensystem ermöglicht es, den Klemmmechanismus des Greifarms mit einer Hand zu lösen und an der optimalen Position des Rahmenrohres zu befestigen.
- 2.) Das Rad kann immer in der richtigen Höhe fixiert und dank drehbarer Klemmbacken um 360° gedreht werden.
- 3.) Die neue, abnehmbare Werkzeugablage mit Haltegriff dient gleichzeitig als praktischer, transportabler Werkzeugkasten.
- 4.) Dank faltbarer Stützfüße ist der Montageständer extrem platzsparend zu verstauen.

The new KETTLER ALU-RAD professional mounting stand with an innovative and very practical quick-release clamping jaws system for the workshop at home.

- Load capacity up to 25 kg
- Working height of 1125 mm 1425 mm
- Clampable frame diameter tubes from 25 mm to 70 mm
- Dimensions with attached tool box: 1275 mm wide / depth of 825 mm / height 1225 mm

- 1.) The innovative, practical clamping jaw system enables the clamping mechanism of the gripper arm to be released with one hand and to be attached to the optimal position of the frame tube.
- 2.) The bike can always be positioned at the right height and rotated 360° thanks to the rotating clamping jaws.
- 3.) The new removable tool tray with handle can also be used as practical, portable tool box.
- 4.) The bike stand is easy to store and extremely space-saving thanks to the foldable legs.

## PRODUKTNEUHEIT **MONKEYLOAD-S** BEFESTIGUNGSSYSTEM FÜR SEITENTASCHEN AM FAHRRADGEPÄCKTRÄGER

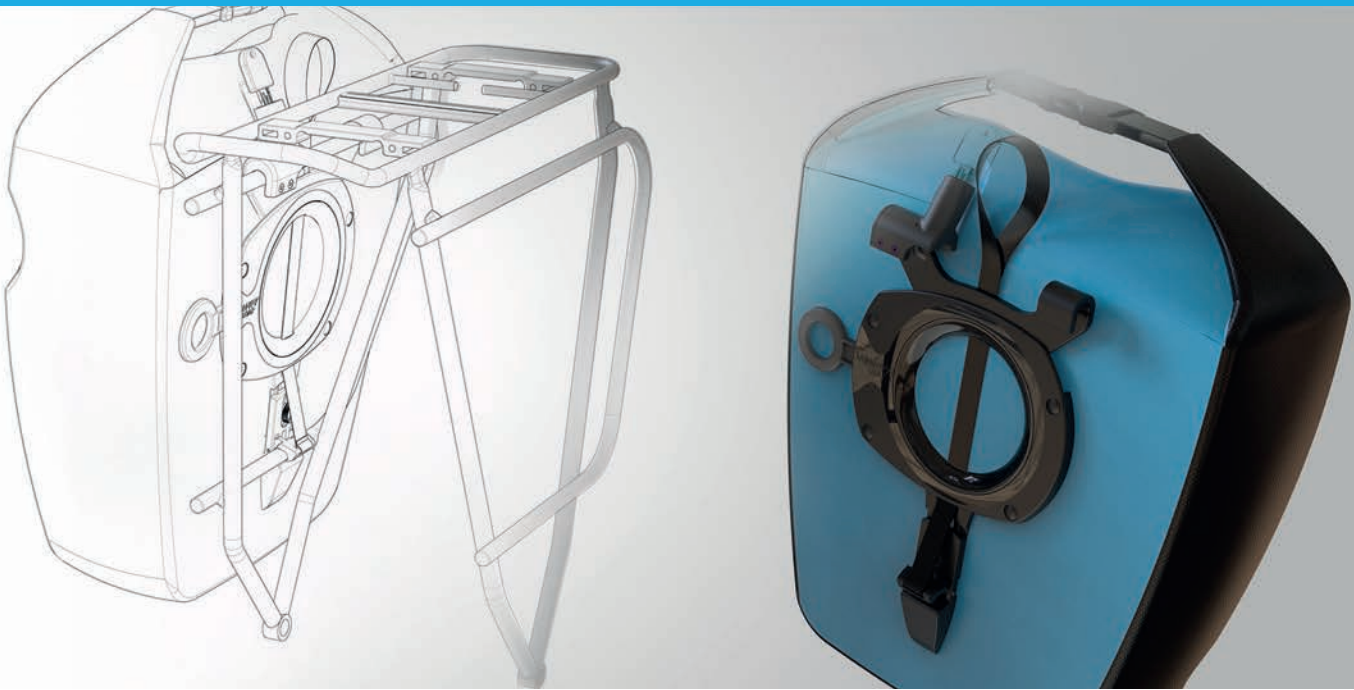

Seit Jahren gibt es viele bewährte Gepäckträger-Taschen, die jedoch eines gemeinsam haben: Sie sind in der Handhabung nicht sonderlich intuitiv. Mit **MonkeyLoad-S** wird das nun anders. Im Gegensatz zu den konventionellen Systemen rastet die Arretierung an der unteren und nicht an der oberen Strebe des Gepäckträgers ein. Durch ihr Eigengewicht klappt die MonkeyLoad-Packtasche über den speziellen Verschlussmechanismus selbsttätig ein. Das im täglichen Gebrauch oft schwierige Anbringen der unteren Halterung entfällt. Beim Abnehmen wird die Verriegelung über ein Band gelöst. Dazu muss die Tasche nur nach oben gezogen werden – einfach, schnell und intuitiv.

Durch das nachrüstbare Schloss kann die Tasche schnell und einfach am Gepäckträger gesichert werden. Dazu lässt sie sich über die werkzeuglose Winkelverstellung in Sekundenschnelle so einstellen, dass maximale Fußfreiheit beim Fahren garantiert ist.

Das neue **MonkeyLoad-S**-System kann auf vielen im Markt befindlichen Gepäckträgern montiert werden. Besonderes Augenmerk wurde auf die optimale Abstimmung von Produkten mit **MonkeyLoad-S**-Ausstattung (z. B. der Marke Northwind) und den Neufahrzeugen der KETTLER Alu-Rad GmbH gelegt. So ist die Voreinstellung der Taschen bereits so konfiguriert, dass eine Einstellung der Tasche auf das Fahrrad nicht mehr notwendig ist.

### KEY FACTS

- Einfache Montage und Demontage, auch im beladenem Zustand.
- Voreingestellt auf die Fahrzeuge der KETTLER Alu-Rad GmbH, Einstellung entfällt.
- Optionales Schloss erhältlich (2. Halbjahr 2021), dadurch diebstahlgeschützt.
- Werkzeuglose Winkeleinstellung, dadurch größerer Abstand vom Fuß beim Pedalieren.

## PRODUCT INNOVATION **MONKEYLOAD-S** ATTACHMENT SYSTEM FOR RACK PANNIERS

Numerous tried and tested rack panniers have been available for years, but they all have one thing in common: their less than intuitive handling. **MonkeyLoad-S** now changes this. In contrast to conventional systems, the lock engages on the lower strut and not on the upper strut of the rack. The MonkeyLoad pannier automatically clips in under its own weight thanks to the special locking mechanism. There is no need to attach the lower bracket, which is often difficult in daily use. When removing, the lock is released via a strap. All that is needed is to pull the bag upwards – easily, quickly and intuitively.

The bag can be quickly and easily secured to the rack using the retrofittable lock. In addition, it can be adjusted in a matter of seconds using the toolless angle adjustment, guaranteeing maximum foot freedom when cycling.

The new **MonkeyLoad-S** system can be fitted to a large range of racks already available on the market. Particular attention was paid to the optimal coordination of third-party products with **MonkeyLoad-S** equipment (e.g. the Northwind brand) and the new bikes of the KETTLER Alu-Rad GmbH. The bag pre-adjustment feature is configured in such a way that it is no longer necessary to adjust the bag to the bike.

### KEY FACTS

- Easy fitting and removal, even when fully loaded.
- Preset for KETTLER Alu-Rad GmbH bikes, adjustment not required.
- Optional lock available (2nd half of 2021), providing protection against theft.
- Tool-free angle adjustment, allowing for greater distance from the foot when pedalling.

## MONKEYLOAD-T EINRASTEN, ABSCHLIESSEN – ABFAHREN!

Ein Klick und Taschen, Körbe und anderes Zubehör sitzen fest auf dem Gepäckträger. Nur noch abschließen und alles ist gesichert. Dank seiner innovativen Konstruktion macht das neue **MonkeyLoad-T** Gepäckträgersystem das Radfahrer-Leben im Alltag und auf Touren ganz leicht.

Kein mühsames Montieren und Positionieren – einrasten, abschließen und fertig! Durch eine spezielle Dämpfungsschicht an der Unterseite der Aufsatzplatte sitzt das **ML-T**-Zubehör optimal auf den Streben des Gepäckträgers. Nichts klappert, alles passt.

Genauso einfach wie das Anbringen funktioniert auch das Entfernen: Aufschließen, den Arretierungsmechanismus mit zwei Fingern kurz nach vorne ziehen, und Taschen, Körbe und anderes Zubehör können in Sekundenschnelle abgenommen werden.

**MonkeyLoad T** – einfach, sicher und vielseitig. Das T steht für Top!

## MONKEYLOAD-T SNAP IN, LOCK AND YOU'RE OFF!

One click and bags, baskets and other accessories sit firmly on the luggage rack. Now just lock it and everything is secure. Thanks to its innovative design, the new **MonkeyLoad-T** luggage rack system makes everyday life and touring as a cyclist really easy.

No tedious assembly and positioning - snap in, lock and you're done! A special damping layer on the underside of the top plate means the **ML-T** accessories sit optimally on the rack stays. Nothing rattles, everything fits.

Removing is just as easy as attaching: unlock, pull the locking mechanism forward briefly using two fingers, and bags, baskets and other accessories can be removed in seconds.

**MonkeyLoad T** – simple, secure and versatile. The T stands for top!

## PRODUKTNEUHEITEN / PRODUCT INNOVATION

### MonkeyLoad T-Adapter

Adapterplatte zur Befestigung von Taschen und Körben am MonkeyLink Systemgepäckträger.

Adapter plate for fixing baskets and bags to the MonkeyLink rack system.

Art.-Nr.: 08949-910

21,90 €\*  
21,90 CHF\*

### Clamp ML-GT

Als optionales Zubehör haben wir eine universelle Federklappe entwickelt die auf alle MonkeyLoad Gepäckträger passt. Die Federklappe lässt sich kinderleicht zusammenbauen und in das ML- Gepäckträgersystem einrasten. Somit können auch herkömmliche Körbe und anderweitiges Gepäck befestigt werden.

As an optional accessory, we have developed a universal spring flap that fits all MonkeyLoad carriers. The spring flap is very easy to assemble and snap into the ML carrier system. This means that conventional baskets and other luggage can also be attached.
